

Website UI Redesign – IRCTC

Problems Identified :

- Cluttered and overcrowded interface
- Poor spacing and alignment
- Confusing navigation structure
- Important actions not highlighted properly
- Inconsistent colour and typography usage

Design Goal :

The goal of this redesign is to simplify the interface and improve usability.

The design focuses on making train search and booking faster, clearer, and user-friendly.

Final Design :

Desktop Design: Clean layout with centred search card and structured train listings.

Mobile Design: Responsive stacked layout for easy navigation and touch interaction.

Conclusion :

The redesigned interface improves usability and enhances visual hierarchy.

It provides a cleaner, more intuitive experience for users booking train tickets.
